

BOYDS™
HARDWOOD GUNSTOCKS

The World's largest aftermarket gunstock maker. *Since 1981*

UPGRADE YOUR FIREARM WITH A HIGH-PERFORMANCE,

HARDWOOD GUNSTOCK FROM BOYDS™

Why Boyds™?

1. Largest selection of gunstocks on the planet

With over 210 brands and over 1,300 models, if BOYDS™ does not offer the model you're looking for - you may not find it elsewhere. And we continually add more models to the lineup!

2. Hardwood only

At BOYDS™ we use only top-grade hardwoods because a hardwood stock performs! Every stock is dried to exact specifications to ensure rigidity and stability, then sealed with chemical-resistant finishes for long-lasting durability and performance in all weather conditions.

3. Enhanced accuracy

BOYDS™ stocks are engineered to fit the model perfectly. Tight where they need to be and loose where they need to be for superior performance and improved accuracy that you can measure.

4. Better fit, better function, "Better with Boyds"

A staggering 62% of all guns do not fit the shooter properly. BOYDS™ gunstocks are hand-crafted for a comfortable, ergonomic fit.

5. A unique look

With 25+ different shapes and 12 different laminate hardwoods, high-grade hardwoods, textured paint options, and a wide selection of laser engravings, now you can build your gun YOUR way.

6. Since 1981

BOYDS™ engineers have continued to perfect manufacturing methods since 1981. That's why you get far more gunstock for the money.

BOYDS™ makes aftermarket stocks for over 210 firearm brands and over 1,300 firearm models!

A shape or configuration that's right for you

You'll find a BOYDS™ gunstock shape ideal for your firearm from the numerous traditional and modern stock configurations available. We have stock shapes designed for shotguns, rifles, ARs, and military firearms and a variety of specialty stocks as well. (See website for complete listing)

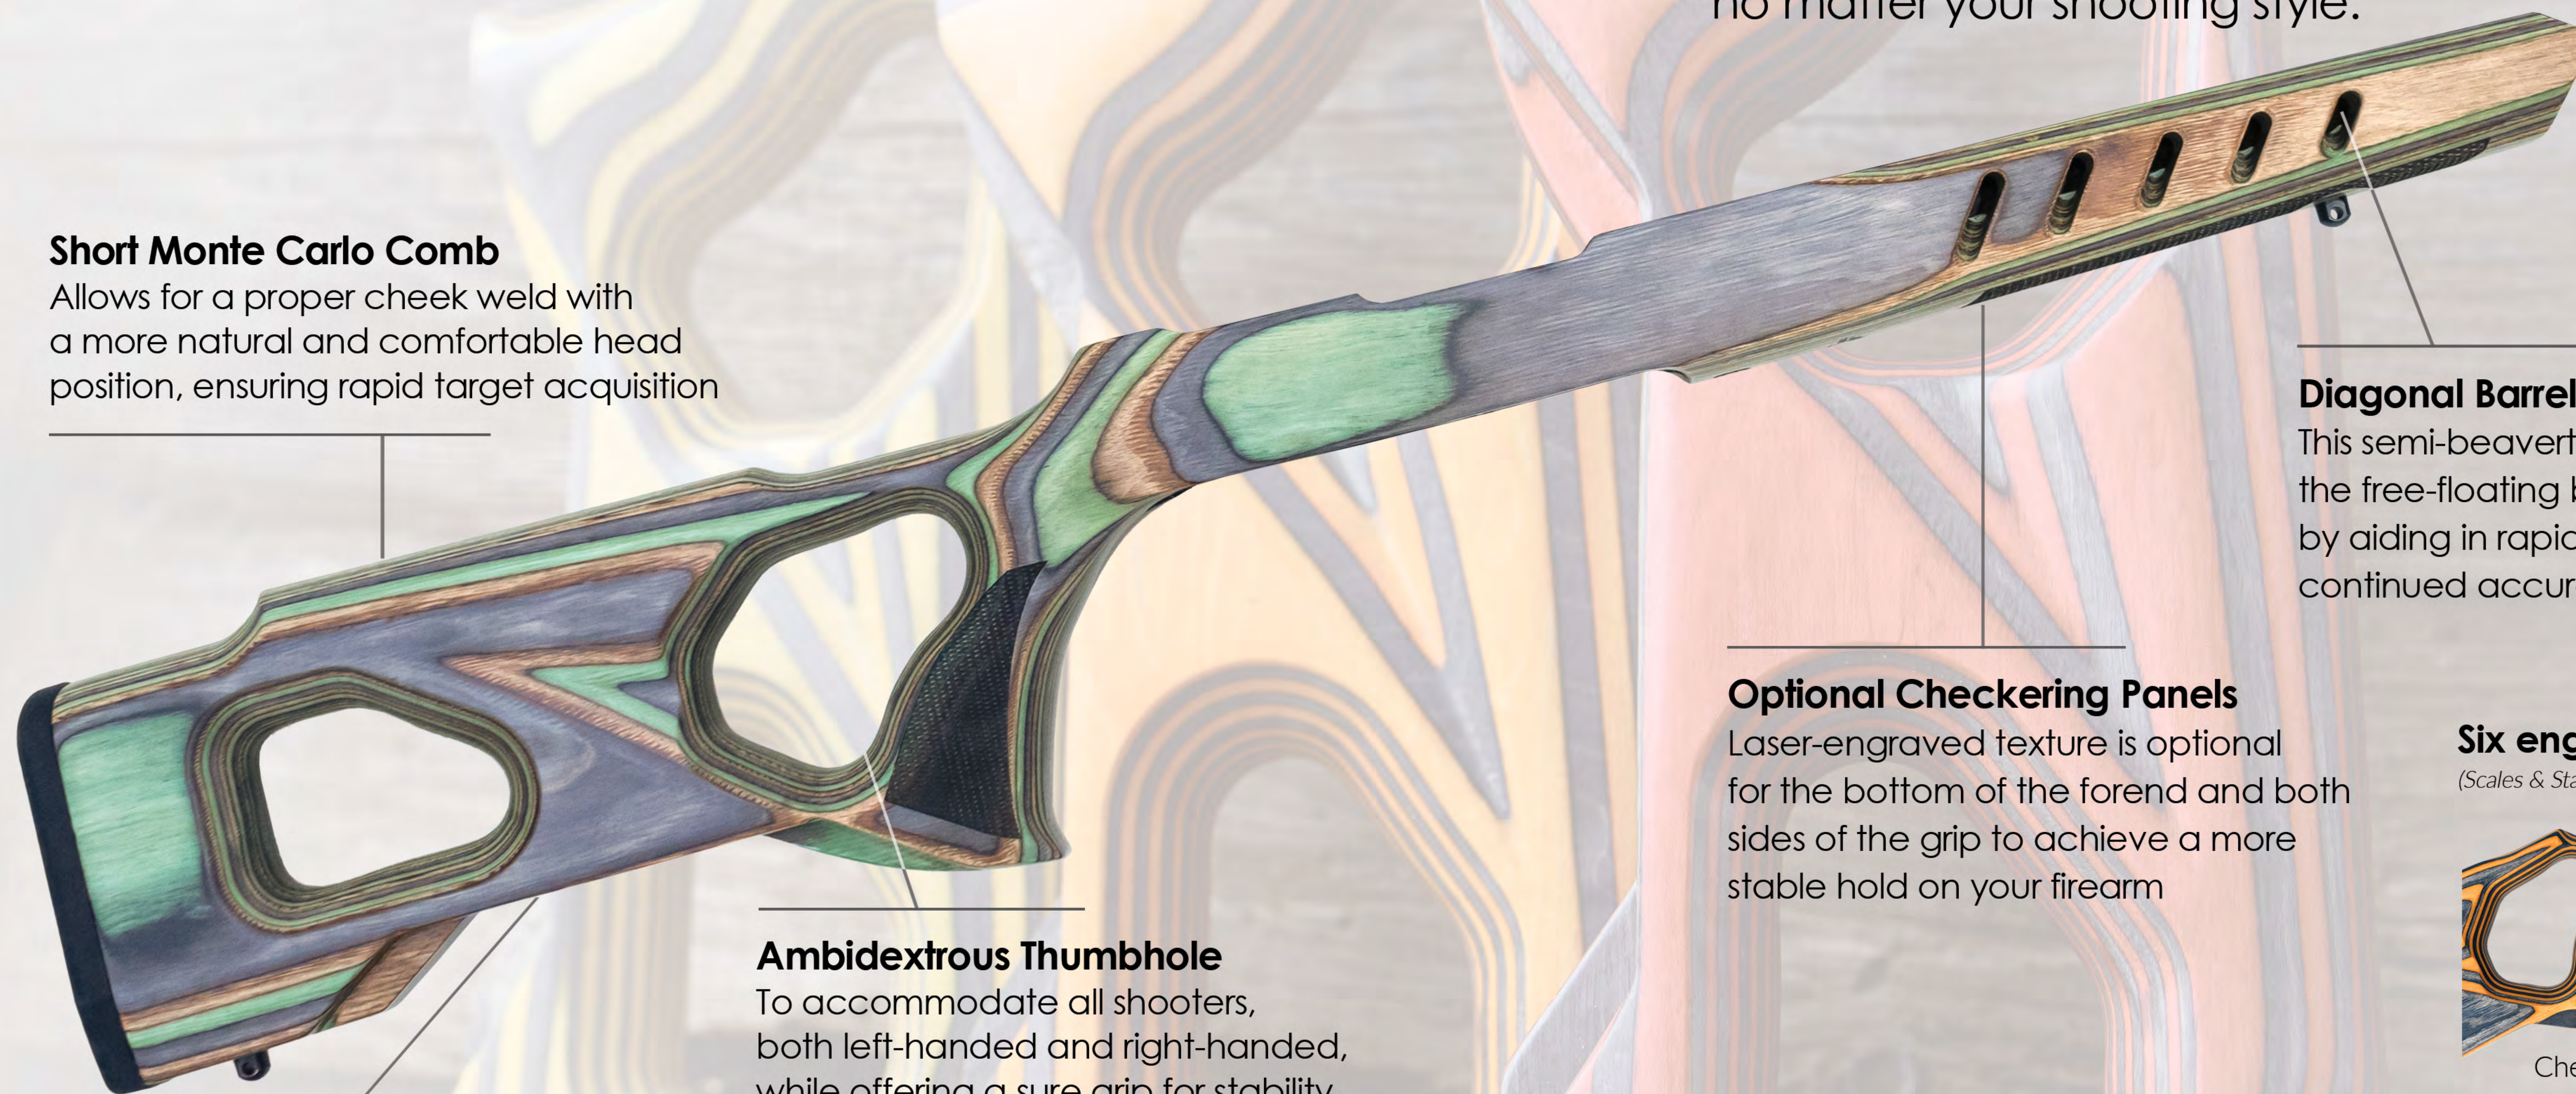

A sleek modern design, **Quest™** Precision Grade Gunstock is equipped with an ambidextrous, enhanced hybrid sure grip thumbhole to accommodate all shooters, a semi-beavertail forend with diagonally cut barrel vents, and a shooting bag cut out with dual purpose hooks, making it easier to ride the bags. This mix of design will improve your shooting experience, no matter your shooting style.

Short Monte Carlo Comb

Allows for a proper cheek weld with a more natural and comfortable head position, ensuring rapid target acquisition

Diagonal Barrel Vents

This semi-beavertail forend allows the free-floating barrel to cool efficiently by aiding in rapid heat dissipation for continued accuracy

Optional Checkering Panels

Laser-engraved texture is optional for the bottom of the forend and both sides of the grip to achieve a more stable hold on your firearm

Ambidextrous Thumbhole

To accommodate all shooters, both left-handed and right-handed, while offering a sure grip for stability and comfort

Shooting Bag Cut Out

A dual-purpose butt hook allows for greater control of the stock and firearm with your non-trigger hand and allows for a better grip on the rear bag when shooting from the bench

Six engraving textures for Quest laser

(Scales & Stars textures not pictured)
